Competition results

Work supported by evidence

Awards and project deliveries are listed separately.

National Third Prize

MathorCup Mathematical Modeling Challenge

Audio encoding, adaptive parameters, and VocalPureNet denoising.

Henan First Prize

CUMCM

Cooperative smoke-screen optimization for multiple UAVs and targets.

First Prize

HKUST Cup Modeling Competition

Thermoelastic modeling, finite-element simulation, and sensitivity analysis.

Complete Delivery

Electrical Engineering Cup Project

Waste-routing report, code, and visualizations.

Project evidence

From reports to working implementations

Distributed data engineering

Hadoop, HDFS, and Hive analysis of one million ratings.

Machine learning comparison

Three classifiers compared; random forest reached 83.41% accuracy.

Java system

A working lost-and-found system with persistence, roles, and validation.

Multivariate analysis

Inference, clustering, discrimination, PCA, and factor analysis.
