Method

# Define, Develop, Verify

Clarify the problem, build the approach, and test the conclusion.

Framework

## From Question to Conclusion

A four-step workflow for modeling, analysis, and development.

01 · Define

### Question & Boundary

State the goal, inputs, outputs, metrics, assumptions, and constraints.

02 · Develop

### Reasoning & Basis

Start with a clear baseline, then choose methods that fit the data and constraints.

03 · Verify

### Build & Test

Implement the approach and test it with comparisons, repeats, and sensitivity checks.

04 · Review

### Conclusion & Revision

State the evidence, scope, errors, limits, and next improvement.
